Learning Technologies at Unley High School

The key aim for the integration of technology into the teaching and learning at Unley High School is to ensure that all students have the opportunity to become competent, discriminating and creative users of a range of technologies. Such integration of technologies has the potential to engage students in ways not previously possible, to enhance their achievement, to create new learning possibilities and to extend students’ interaction with their local and global communities.

Unley High School is a technology-rich environment, integrating technology into all teaching and learning areas so as to enhance learning and to prepare our students for their roles in the digital world in which we live. Today’s generation of students view technology as part of their everyday environment. To fully meet their learning needs, technology should be pervasive, that is, always available. To achieve this, Unley High School is currently implementing a range of new and innovative approaches to teaching and learning using new and emerging learning technologies. These include trolleys of Windows NetBooks and laptops located across the school, maintaining the availability of computers in labs (6 in total) and supporting students who wish to bring their own laptop (Windows or Apple), enabling them to access the school’s Internet on site. Ultimately, achieving a 1-to-1 teaching and learning environment that incorporates the new and emerging technologies that are an every-day part of the lives of our students, is our aim.

In 1-to-1 learning, each student has access to a wireless laptop or mobile device for use at school and at home, enabling communication and collaboration among peers and teachers and connecting caregivers to their child’s learning. Educators are provided with digital tools to create learning plans, manage educational content, track student progress and more. The 2011 iPad2 Trial enabled us to participate in some “action research”, during which we were able to gather data to support the notion that, having a mobile device such as an iPad in the hands of students, 24 hours-a-day, 7 days a week engages the students in learning and ultimately results in measurable improvement in their learning outcomes, their grades.

With such a focus on the use of new technologies in the teaching and learning that occurs at Unley High School, it is necessary for us to establish appropriate policies and procedures. Whilst providing the opportunity to enhance and extend human interaction, empathy and understanding, the misuse of information and communication technologies can significantly damage an individual’s dignity. It is a requirement that all students and their caregivers read and abide by the school’s Acceptable Use of Learning Technologies Policy. It is a Department of Education and Child Development (DECD) requirement that all students and their caregivers sign the Acceptable Use of Learning Technologies Policy before the student is permitted to access learning technologies on any Departmental School site. Once signed and returned to school, the document is filed in the student’s records and acknowledged in the school’s database. This agreement then remains valid and in place for the duration of the student’s enrolment at Unley High School or until it is reviewed or revoked by the school.

The contents of this information pack are designed to assist students and families to become familiar with the iPad, specifically how to manage and care for this tool for learning. We ask that you read the contents of this document carefully and keep it handy for when you need it. Online help is always available on the Apple website (www.apple.com.au) or you can email your question to ms.ipads@uhs.sa.edu.au and one of the UHS IT Team will reply as quickly as possible.
Your iPad

We encourage you to record the information specific to your iPad in this section:

Student Name: ____________________________ ID Number: ____________

iPad 64GB Wireless ____________________________ (Colour)
Serial Number: ____________________________ (on iPad box)
IMEI Number: ____________________________ (on iPad box)
MAC Address: ____________________________ (in Settings on iPad)
Cover Type: ____________________________ Colour: ______________

What do you need to purchase? (Note: those families who purchase the iPad via our reseller, LeetGeek ... your delivered bundle will include the components you ordered online.)
Options include:

- iPad (inc. extras on page 5)
- The iPad Case you selected
- iTunes $150 Credit (3 x $50 iTunes Card)
- Apple Care Protection Plan (recommended)

Apple Phone Assistance is available for 3 Months for any iPad purchased. NOTE: The Apple Care Protection Plan increases this assistance to 2 years.

Phone 1300 968 979

Contacting Unley High School IT Department

ms.ipads@uhs.sa.edu.au

8272 1455

Unley High School IT Department:

Mr. Konrad Date ...... IT Manager
Mr Michael O’Toole ...... IT Support
Mr. Marc Vallance ...... IT Support
Mrs Cherie Pickering ...... Assistant Principal, Learning Technologies
**What’s in the box?**

- iPad with Retina display
- Lightning to USB Cable
- USB Power Adapter

**What else do you need?**

You will need a suitable case for your iPad. We would prefer that you had a folio type case as these provide good protection and double as a stand. There will be a range of cases available if you choose to order through LeetGeek. Examples and estimated costs are shown below. Alternatively, you can purchase cases from most retail outlets including BigW, Target, KMart, Myers, David Jones, JBs and Dick Smiths Electrical. You are expected to keep your iPad in the case at all times.

**Range of Folios**
From $35 to $50

**Solid Back Cover**
PLUS Slip Case
Approximately $50

**Apple Smart Case**
Cost is $59

**“All inclusive” type case**
that encases the iPad
From $50 to $80

Three $50 iTunes Cards which are to be used to purchase the required Apps listed in this information booklet. (See pages 22 - 28)

**NOTE:** The best time to buy iTunes Cards is when they are on sale. For example, at 20% off you will pay $80 for $100 in iTunes credit OR at 25% off you will pay $75 for $100 iTunes credit.
Get to know your iPad

Built-in Apps

Important Tech Specs that you need to know

Size and Weight
- Height: 241.2 mm (9.50 inches)
- Width: 185.7 mm (7.31 inches)
- Depth: 9.4 mm (0.37 inch)
- Weight: 652 g (1.44 pounds)

Battery and Powers
- Built-in 42.5–watt-hour rechargeable lithium-polymer battery
- Up to 10 hours of surfing the web on Wi-Fi, watching video or listening to music
- Charging via power adapter or USB to computer system

System Requirements
- Apple ID (required for some features)
- Internet access
- Syncing with iTunes on a Mac or PC requires:
  - Mac: OS X v10.6.8 or later
  - PC: Windows 7; Windows Vista; or Windows XP Home or Professional with Service Pack 2 or later
  - Download iTunes at www.itunes.com/au/download
Input/Output
- Lightning connector
- 3.5-mm stereo headphone minijack
- Built-in speaker
- Microphone

Display
- Retina display
- 9.7-inch (diagonal) LED-backlit Multi-Touch display with IPS technology
- 2048-by-1536 resolution at 264 pixels per inch (ppi)
- Fingerprint-resistant oleophobic coating

Wireless and Cellular
- 802.11a/b/g/n Wi-Fi (802.11n 2.4GHz and 5GHz)
- Bluetooth 4.0 wireless technology

Location
- Wi-Fi
- Digital compass

Sensors
- Three-axis gyro
- Accelerometer
- Ambient light sensor

Cameras, Photos and Video Recording
**FaceTime HD Camera**
- 1.2-megapixel photos
- 720p HD video
- FaceTime video calling over Wi-Fi or cellular¹
- Face detection
- Backside illumination
- Tap to control exposure for video or still images
- Photo and video geotagging

**iSight camera**
- 5-megapixel photos
- Autofocus
- Face detection
- Backside illumination
- Five-element lens
- Hybrid IR filter
- f/2.4 aperture
- Tap to focus video or still images
- Tap to control exposure for video or still images
- Photo and video geotagging

**Video Recording**
- 1080p HD video recording
- Video stabilisation
- Face detection
- Tap to focus while recording
- Backside illumination
Accessibility

- VoiceOver screen reader
- Guided Access
- Support for playback of closed-captioned content
- AssistiveTouch interface for adaptive accessories
- Full-screen zoom magnification
- Large text
- Option to invert colours
- Left/right volume adjustment

Languages

- Language support for English (US), English (UK), Chinese (Simplified), Chinese (Traditional), French, German, Italian, Japanese, Korean, Spanish, Arabic, Catalan, Croatian, Czech, Danish, Dutch, Finnish, Greek, Hebrew, Hungarian, Indonesian, Malay, Norwegian, Polish, Portuguese, Portuguese (Brazil), Romanian, Russian, Slovak, Swedish, Thai, Turkish, Ukrainian, Vietnamese
- Keyboard support for English (US), English (Australia), English (Canada), English (UK), Chinese — Simplified (Handwriting, Pinyin, Stroke), Chinese — Traditional (Handwriting, Pinyin, Zhuyin, Cangjie, Stroke), French, French (Canada), French (Switzerland), German (Germany), German (Switzerland), Italian, Japanese (Romaji, Kana), Korean, Spanish, Arabic, Bulgarian, Catalan, Cherokee, Croatian, Czech, Danish, Dutch, Emoji, Estonian, Finnish, Flemish, Greek, Hawaiian, Hebrew, Hindi, Hungarian, Icelandic, Indonesian, Latvian, Lithuanian, Macedonian, Malay, Norwegian, Polish, Portuguese (Portugal), Portuguese (Brazil), Romanian, Russian, Serbian (Cyrillic/Latin), Slovak, Swedish, Thai, Tibetan, Turkish, Ukrainian, Vietnamese
- Dictionary support (enables predictive text and autocorrect) for English (US), English (Australia), English (Canada), English (UK), Chinese — Simplified (Handwriting, Pinyin, Stroke), Chinese — Traditional (Handwriting, Pinyin, Zhuyin, Cangjie, Stroke), French, French (Canada), French (Switzerland), German (Germany), German (Switzerland), Italian, Japanese (Romaji, Kana), Korean, Spanish, Arabic, Bulgarian, Catalan, Cherokee, Croatian, Czech, Danish, Dutch, Estonian, Finnish, Flemish, Greek, Hawaiian, Hebrew, Hindi, Hungarian, Icelandic, Indonesian, Latvian, Lithuanian, Macedonian, Malay, Norwegian, Polish, Portuguese (Portugal), Portuguese (Brazil), Romanian, Russian, Serbian (Cyrillic/Latin), Slovak, Swedish, Thai, Turkish, Ukrainian, Vietnamese
- Siri language support for English (US, UK, Canada, Australia), Spanish (US, Mexico, Spain), French (France, Canada, Switzerland), German (Germany, Switzerland), Italian (Italy, Switzerland), Japanese, Korean, Mandarin (Mainland China, Taiwan), Cantonese (Hong Kong)

Mail Attachment Support

- Viewable document types: .jpg, .tiff, .gif (images); .doc and .docx (Microsoft Word); .htm and .html (web pages); .key (Keynote); .numbers (Numbers); .pages (Pages); .pdf (Preview and Adobe Acrobat); .ppt and .pptx (Microsoft PowerPoint); .txt (text); .rtf (rich text format); .vcf (contact information); .xls and .xlsx (Microsoft Excel)
**Password Tips and Tricks**

Passwords should contain uppercase letters, lowercase letters and numbers

**DO NOT use a common dictionary word**

Use substitute numbers for letters in words. For example, “DEVIL” could become “D3VIL”, “COFFEE” could become “COFF33”.

Try to think of a sentence or phrase and use the first letter of each word. For example, “my iPad is the best” could become “mip2itb”.

From here, substitute some letters for capitals, numbers or symbols. For example, “mip2itb” could become “M!p2!tB”

Add something on the end relating to the use for the password. For example, an iTunes account password could be “M!p2!tBTun”

This gives you a really strong password with a rating of 93% (checked using “The Password Meter” [http://www.passwordmeter.com/](http://www.passwordmeter.com/))

**iPad Do’s and Don’ts**

**DO’s**

1. **Charge and Sync your iPad overnight**
   We want you to get the most out of your iPad while at school. Therefore, you need to make sure that you have a full battery when you arrive in the morning. Remember to do a complete sync to your home computer each night or backup to iCloud. This way, you will always have an up-to-date backup of your iPad in the unlikely event that you will need to restore.

2. **Keep the cover on your iPad**
   Be sure to keep your iPad safe at all times. For example, the folio-type case is designed to be kept in place while you work and while you sync or charge your iPad.

3. **Report any damage to your iPad**
   We will not get angry, accidents happen! We want you to be working as effectively as you can on an iPad and will help you to get up and running as soon as we can.

4. **Have some unused iTunes credit in your account**
   There will be occasions where your subject teachers will ask you to purchase content for your iPad. This process will need to be done at home, not at school. Be sure that you have some unused iTunes credit in this event.

5. **Use your iPad in accordance with the Acceptable Use of Learning Technologies Policy**
   An electronic copy can be found on the Unley High School website. You will be asked to sign this document before you are permitted to access Learning Technologies on the school grounds.
**DON’Ts**

1. **Leave your iPad unattended**
   Make sure that you keep your iPad locked away and secure when not in use. This avoids the risk that your iPad will get misused or stolen.

2. **Put your iPad in a humid environment**
   Do not use your iPad to listen to music while in the shower. Treat it as you would any other electrical device. iPads do not like extreme heat or cold temperatures.

3. **Place your iPad in between other books**
   Your iPad is a fragile device. Placing it in between heavy books and folders will cause damage.

4. **Place your iPad insecurely on top of a pile of other things**
   Your iPad is valuable. Placing it on top of a pile you are carrying is insecure. If you have doubt ... go without! Make two trips.

5. **Connect your iPad to the school computers**
   Connecting your iPad to a school computer will wipe your iPad and make it useless. You will have to take your iPad home and restore from a back-up before you will be able to use it again.

6. **Access more than 1 iTunes account on your iPad**
   iPads are intended as single-user devices. Only have one iTunes account registered per iTunes Library to avoid Apps and other content being deleted from your iPad.

---

**Useful resources to help you ...**

[Apps for Education](http://www.apple.com/education/apps/)

This page on the Apple website has information about Apps for Education, including links to subject-related collections of Apps:

- Apps for learning to read
- Apps for learning to write
- Apps for learning Math
- Apps for learning Astronomy and Earth Science
- Apps for learning Life Science
- Apps for learning Chemistry
- Apps for learning Physics
- Apps for learning Geography
- Apps for learning Music
- Apps for learning foreign languages (LOTE)
- Apps for learning English as a Second Language (ESL)
**Setting up an iTunes Account**

If you don’t have iTunes installed on your computer, you can download iTunes from here: [http://www.apple.com/itunes/download/](http://www.apple.com/itunes/download/)

You can download either a Macintosh or Windows version of iTunes from this address. The default version is for Apple computers. Scroll down the page and look for the Windows download link.

1. Once you have installed iTunes, if you don’t already have an iTunes account, open iTunes. Go to the STORE menu and click on *Create Account*.

2. Click *Continue* on the “Welcome to iTunes” screen.

3. To proceed, you will need to agree to the **iTunes Terms and Conditions**. Click the checkbox next to, “I have read and agree to these terms and conditions”.

4. Complete the form to create an Apple ID (which is what you will use to log into the iTunes Store).

5. Redeem your $50 iTunes Gift Card.

6. We encourage you **NOT TO** enter Credit Card details.

7. Once you’ve provided all the required information, click *Continue*.

8. NB: If your iTunes code on the back of your card is unreadable, please follow the steps on Page 13.

9. A confirmation screen will appear once you have successfully redeemed your iTunes Card.

10. You will need to verify your email address. Check your email for a verification email from Apple.
   (i) In the verification email you receive from Apple, click on the *Verify Now* link.
   (ii) You will be taken to the Apple ID page to verify your email address.
   (iii) Enter the email address and password you used to create your Apple ID. Then click *Verify Address*. 

Page 12
Having trouble activating your iTunes Card?

Go to the Apple Australia Website (http://www.apple.com/au/) and Click on Support.

Click on iTunes.

Click on iTunes Cards and Codes > Redemption Questions.

Follow the list of suggestions provided on the right.

Once you have tried the suggestions by Apple, click the Email Us button.

Enter the details required. You will receive an email from Apple confirming that they will investigate the issue.

Within 48 hours, you will receive another email giving the correct code to redeem through iTunes. If you do not receive these emails, check in your Junk Email folders.
**Manually Setting up your iPad by Synchronising to a Computer**

Connect the iPad to a USB 2.0 or USB 3.0 Port on your Mac or PC using the cable that came with the iPad. When you connect the Lightning Connector end to the iPad, be sure that you insert the cable carefully.

Once you have connected your iPad to your computer, the “Welcome to your new iPad” screen will be displayed in iTunes.

Click *Continue*

Make sure you read the *iPad Software Licence Agreement*.

Select the check box and *Continue*.

**IMPORTANT**

Click to *Set up as a new iPad* (this will only appear if you have previously synced an iOS device to your computer)
Enter a name for your iPad. We suggest Firstname Lastname’s iPad

Ensure the automatically sync applications to my iPad is selected and click Done.

You are now ready to select your sync options and customise your iPad.

Be sure to go through all of the sync options within the tabs in iTunes to be sure you have all the required content on your iPad.

Setting up your iPad without using a computer

Once you’ve unboxed your iPad, turn it on by pressing the On/Off switch. A welcome screen greets you, displaying a Slide To Set Up slider in a variety of different languages. (If you need quick access to your device’s IMEI or ICCID number without setting up the device, you can tap the information button [represented by a lowercase i] located directly above the slider.)

To begin the activation process, slide the switch to the right, where you’re asked to pick your language, country, and if you’d like to enable Location Services. This allows Apple apps (and third-party apps) to access your location via Wi-Fi networks and your Global Positioning System (GPS) location.

Your iPad will check for any Wi-Fi networks in the area that you can connect to; unfortunately, if it doesn’t find any, you’ll have to set up your iPad via iTunes and the computer.

The first thing you need to decide is whether to supply an Apple ID (or create one, if you don’t have one). You use your Apple ID to buy music from iTunes, apps from the App Store, books from the iBookstore, and for iCloud.
If you don’t have an Apple ID, it’s easy enough to create one by tapping the Create A Free Apple ID button. You’ll need to enter your birthday, name, your email address (or create a new iCloud email address), a password, a security question (in case you forget your password), and whether you’d like to receive email updates from Apple.

If you've chosen to set up or register an Apple ID, you can also enable iCloud on your device. iCloud is an umbrella term for Apple's collection of sync services, and allows you to sync your photos, apps, contacts, calendars, and mail across multiple devices.

Choose to set up iCloud, and you'll first be asked whether you'd like to enable iCloud backups for your device. If you do so, you can have your iPad back up all essential settings to your iCloud account; if you ever need to restore, you can do so over Wi-Fi without an additional computer. You can also elect to have your iPad back up to your computer using iTunes. Additionally, you'll be asked whether you’d like to opt in to iCloud Find My iPad service. This will enable location monitoring for your iPad, allowing you to find it using your Apple ID and the Find My iPhone app from another iOS device, or by logging into your iCloud account online, should it go missing.

Once you finish the setup process, you'll be asked if you'd like to send Apple anonymous diagnostics and usage information (similar to a desktop crash report). After that, your iPad will be all set and ready for you to begin using.

Visit Macworld to learn how to take advantage of the iOS Basic Navigation using gestures.
Connecting to Wi-Fi at School

Tap the Settings icon

Tap Wi-Fi and then select the WiFi you wish to connect to.

At school, select WPA

Enter your Username and Password ... the one you use to log into a computer at school.

Tap ACCEPT to accept the security certificate.

Once your iPad connects to the school’s wireless, you will see the details for the IP address and other important details appear down the right-hand side of the list. Close your Settings session by tapping the big Home button.

Open Safari and type the following address into the browser address line at the top. You will be directed to our setup page.

```
ipad.uhs.sa.edu.au
```

There are still a number of steps involved and screens which provide you step-by-step directions. However, a number of important things happen in the background to make this process more reliable for you as a user. Please read the instructions carefully, both here in the book and on your iPad screen.

Tap on Install Profile
This will open the Certificate for the Profiles Setup.

Tap Install

You will get this warning screen.
Tap Install Now.

NOTE:
If you have a Passcode, you will need to enter it before the profile can be installed.

In this step, you will set up your connection with the DayMap and Moodle servers plus other resources needed in your learning.

Enter you username ... the one you use to log onto a computer at school.

Tap Next

Now enter your Password ... again, it’s the one you use to log in at school.

Tap next again.
The next part sets up your school email with the Mail App on your iPad.

Enter your school email address. It will be ...

`firstname.surname@uhs.sa.edu.au`

Tap **Next**

You have to enter your username for the Exchange server.

Type (with no spaces) ...

`aduhs0797\s + your ID number`

Tap **Next**

Then enter your password again ... the one you use when you log on at school.
You might get this blue window saying that your identity can not be verified.

If you do, then tap CONTINUE

OR ... you might be prompted with this blue window. TAP SKIP

In both cases, the problem will resolve itself once the iPad is connected to the network.

Next, you will get the Certificate page again, with the certificate showing.

Select DONE

You have successfully joined the servers and set up your email.
When you go back to your Home screen, you should see these new App Icons. These are actually shortcuts to the DayMap and Moodle Servers plus a selection of other resources that you need in your learning.

To group them together into a folder, touch and hold one and drag it on top of the other one.

Repeat this step until all of the new icons are grouped into a single folder.

Name the folder ...

**UHS Links**

Next step is to restart your iPad to ensure that it picks up and retains all the settings.
Now you can download your email. On the bottom Doc of your screen, your will see the Mail App.

You school email will be called “UHS Email”. Tap on it and your email will be downloaded to your iPad. This may take a few minutes, depending on how much email there is to download.

**TIPS on how to organise your Apps on your iPad**

If you press and hold one of the apps (any one) they should start to shake. You can then:

- press the 'x' in the top left corner to delete them (you cannot delete Apple's built-in apps such as Music, App Store, Newsstand etc). If you don't see 'x' on any of the downloaded apps then check that Settings > General > Restrictions > Deleting Apps isn't off
- rearrange their order by dragging one to a different place on the screen (you cannot leave blank spaces between apps on a screen)
- create a folder by dragging and then holding one app on top of another. You can then rename the folder if you want to (folder renaming can be done whilst the apps are shaking)
- add an app to a folder by dragging an app so that it is on top of a folder
- move an app to a different home screen by dragging it so that it overhangs the edge of the screen; after a second or two the screen should then display the next or previous screen (depending on which side of the screen you are holding it)

When you've finished press the home button so as to stop the shaking.

You can also do all of this when connected to your computer's iTunes, via the device's apps tab and the images of the iPads screen(s) (the changes don't take affect until you sync the changes to the iPad). Some people find this way easier.
**Required Applications**

Below is the beginning list of Apps (applications) that you are required to have on your iPad. The first section lists Apps that must be purchased for use across all areas of the curriculum.

**Apps to be purchased**

<table>
<thead>
<tr>
<th>Title</th>
<th>Price</th>
<th>Link</th>
</tr>
</thead>
</table>

**Sub Total** $65.91
Some additional Apps that you might like to investigate.

These are a few of the many Apps available for purchase from the iTunes Store. They are not a requirement of the program. However, they may be useful Apps to support your education. During your exploration of the Apps on the iTunes Store, you will come across many. If you choose to purchase these, then you do so at your cost. A few I recommend are:

<table>

<td>$4.49</td>
<td><img src="images/cbb.png" alt="Icon" /></td>
</tr>
</tbody>
</table>
**FREE Apps to download**

On the following pages, you will find an initial list of FREE Apps that you will find useful on your iPad. Please make sure you download these mandatory apps in readiness for the start of the school year.

You are encouraged to explore the Apps on the iTunes store. If you find Apps that you believe would be suitable for use in your subjects, please share them with your teacher. This is a learning experience for us all and the best way to learn is to do so together.

You are not expected to download all of the free Apps in one day. However, by the end of your first week of Year 8, you are expected to have these Apps on your iPad.

### Mandatory Subject Specific Apps Required

The Apps listed under specific subjects have been requested by the subject teachers. Please note that some of these might be Paid Apps. Where possible, teachers will use Free Apps. In subjects where no individual Apps are listed (see below) you can expect that, from time to time, your teachers will ask you to download specific Apps ready for a lesson the following day or during that week. Please do your best to have the requested App installed and ready for your class. If you have difficulty getting an App ... or, if you’ve run out of credit on your iTunes account and need to wait until you can get some more ... make sure you talk to your teacher and explain why you haven’t got the App installed. You might already have a similar App that you can use until you can get the one requested by the teacher. Again, make sure you talk to the teacher so that he or she knows your circumstances.

IMPORTANT NOTE: As noted previously, teachers of the subjects listed below will advise you of Apps required for specific topics as you progress through their courses. Please make sure you have credit available on your iTunes account so that you can purchase the apps when ask to do so by your teacher.

English ...
Science ...
Physical Education ...
Languages Other Than English (LOTE) ... French, Italian, Greek

Frequently Asked Questions

Will my son/daughter still need to access a computer?

The iPad is not a computer. At this time, it can either be docked with a computer to sync the apps and other files, or synchronised using iCloud. If synchronised using iTunes, the computer will serve as its backup device, its charging station and its management tool.

How will students connect to the Internet?

Details about how to connect to the school's wireless is provided on page 17 of this information booklet. At home, the iPad should find your personal wireless network. You will need to know the password to connect to your personal wireless.

Once the wireless connections are made, the iPad will remember them and should locate the wireless seamlessly when you arrive at school or at home..

Who owns the iPads?

The iPad belongs to your child. However, your child is required to abide by the Acceptable Use of Learning Technologies Policy signed by the student and his or her parents/care givers at the start of the school year.

Who is responsible for loss or damage to the iPad?

The iPad is covered by the standard Apple 12 Month Warranty, for any manufacturing problems. iPads purchased via our supplier are covered by the Apple Care Protection Plan for a total of 2 years if that option was selected. We encourage you to contact your Home Insurance provider to ensure that the iPad is covered at home, in transit to and from school and at school.

Will the school back up the iPad and its data?

No. Data on the iPad exists either in the application that created it or in cloud-based storage facilities. Data in the cloud is backed up by the cloud server. Data on the device is backed up to the home computer whenever it is connected and synchronised.
We strongly suggest the device is connected to the home computer every night to ensure it is fully backed up should any potential problems occur. Alternatively, use iCloud as your means of backing up data held on the iPad.

The iPad should also be charged ready for the following day at school. If the device needs to be replaced due to loss or damage, the backup on the home computer will ensure that the replacement device is a direct clone of the previous one.

**Can the iPad be used with a printer?**

Printing from the iPad, at school, will not be possible. There are many apps that allow printing from this device and reviews about these Apps can by found via a simple Google search. Remember, this device is designed to be a simple device to read on. Printing from the iPad is not necessary, as it has been from computers in the past. You will be submitting your work to your teachers in electronic formats.

**Is my child allowed to install other Apps?**

Absolutely allowed and encouraged! The iPad is a personal user device. It will be the student’s tool to assist his or her learning. We anticipate students will choose from a selection of Apps that they prefer for many of the basic uses of the device.

Students are encouraged to try out and use different Apps. Part of the learning involved in the use of the iPad, is in the literacy of technical choice. Students will learn how to select the best App for a given task. The best App will be the one that best meets their needs at the time. Naturally, subject teachers will also specify Apps that best meet their curriculum needs. Any Apps purchased are the property of your child. Apps are often free, others range in cost, on average, from 99c to $5.49.

**How can I find out more about the iPad and its use?**

The Apple website is your first port of call if you want to find out more about the device.

http://www.apple.com/ipad/
Support Options

Apple

Contact Apple on 1300 968 979 and ask whatever question you may have about your device. They will be most supportive on most issues.

Apple support is available for a period of 3 months from the date of purchase and from 8:30am to 8:30pm Sydney time. You will need to have your iPad with you when you call. Apple will ask for specific identification that will be found on the iPad.

Apple iPads have a 12-month Warranty. If you purchased the bundle from our authorised Apple Reseller, you will have had the opportunity to in your package the Apple Care Protection Plan, which means that you will have a total of 2-years warranty on your device.

Call school

8272 1455 during school hours only
Ask for IT Department. Explain that you are part of the iPad Program. We will endeavour to assist right away over the phone. We are unsure of what the load will be on our department as this varies day-by-day, however we will make every effort to answer your questions.

eMail the School

ms.ipads@uhs.sa.edu.au

IT staff will respond to your questions as quickly as possible.

Walk in

Walk in help for simple questions will be available from the IT Department. The IT Office is open from 9:00am to 3:00pm. If you require a lengthy help session, please contact us first. You will need to make an appointment.

Important:

We want our families to know that the iPad is still new to most of our staff at this time. They are on an extensive program of support to develop their skills in how to best use this device. Basically, our staff and students are on a learning journey that will be used by our school to help us make decisions about how new and emerging learning technologies can best be used to support the teaching and learning at UHS. Consequently, we suggest that, at this point in time, our staff not be the first point of contact for support.
NOTE: This document was initially created in 2011 for the purpose of the Unley High School Year 8 iPad2 Trial. It is based on similar documents created by Walford Girls (Adelaide) and Acacia College (Victoria).

This updated edition created October 2012.

Images used in this booklet include photos and icons related to the iPad and Apps copied from the Apple website and the Apple iTunes Store.

Images of students were taken during the 2012 at Unley High School.
